The logo features a stylized red and white wave above the word "EQUIP" in a bold, italicized, black sans-serif font.

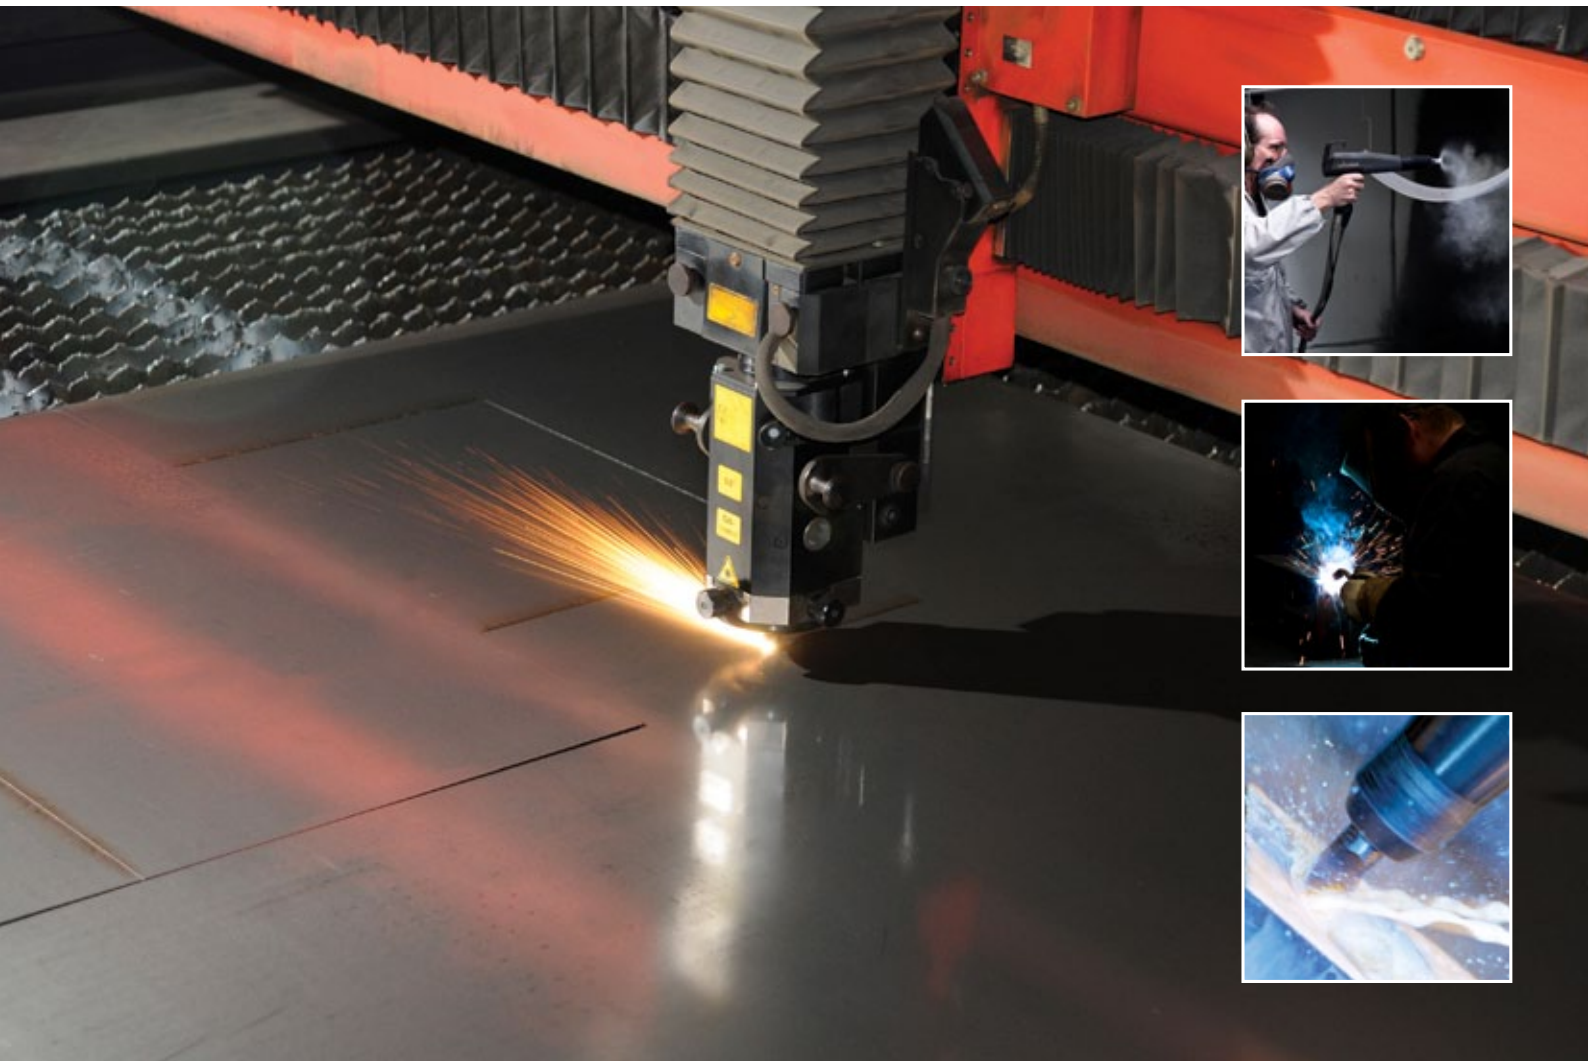

## 21st Century Innovation & Expertise

Equip are a UK based precision engineering and fabrication company delivering high quality manufacturing services at competitive rates. Our 21st Century environment inspires us to work collaboratively at high speed to produce top quality innovative products.

We are able to use our considerable industry experience and technical expertise to provide the complete service range from prototype to full production working alongside our clients to ensure we deliver precisely what they need.

Over the last ten years we have maintained sustainable growth recently moving premises to expand our capacity and comprehensive range of in house services.

In our ever changing world our commitment to innovation remains the same.

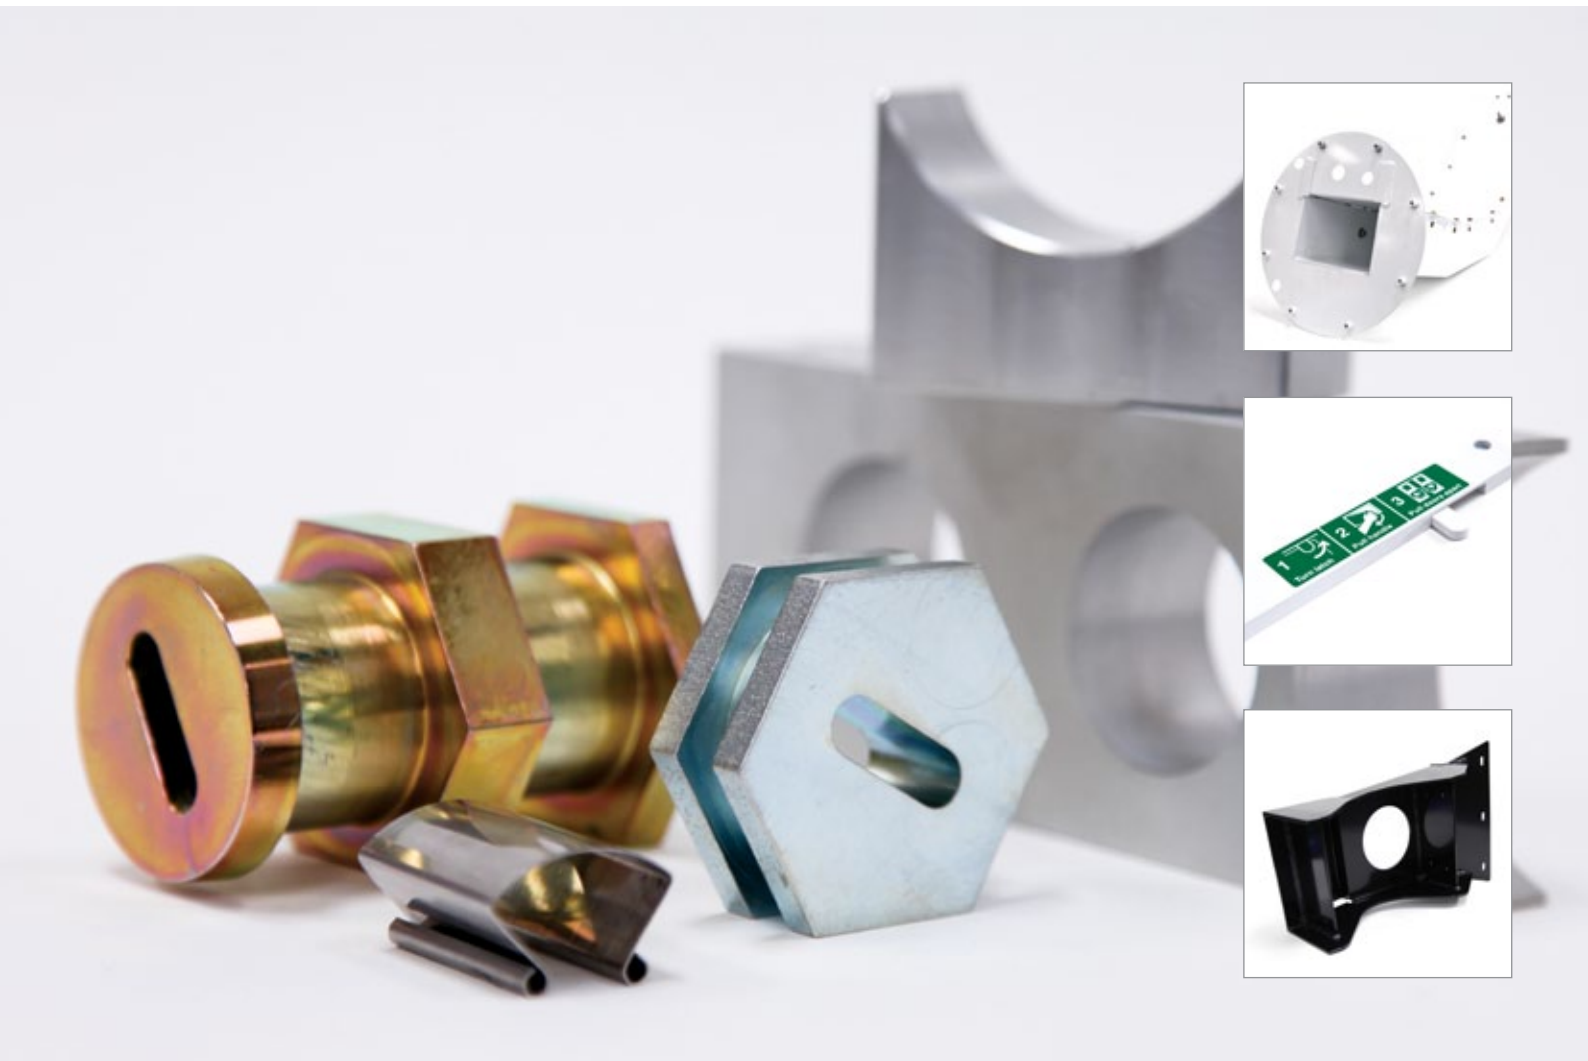

## Manufacturing Excellence

Our modern manufacturing environment is dedicated to providing excellence at affordable price points. We have a dedicated, highly skilled operational team providing 3D/CAD Design Services, Bystronic Byspeed Laser Cutting, CNC Machining, Welding, Powder Coating, Fabrication and Assembly Facilities.

Our flexibility enables us to offer everything from prototype and small volume specialist products through to large scale production runs including product development from concept to completion.

Our manufacturing services run 24 hours a day meeting the requirements of our ever expanding client base which includes the rail and mass transit, bus and coach, marine, automotive, construction and defence, to name but a few!

## Reassuring Quality

We are passionate about our services and products and aim to exceed expectations at every opportunity by listening to and understanding our clients and maintaining excellent communication throughout the production.

Our dedicated quality assurance team oversees and inspects every part of our ISO approved production process ensuring each order meets our client's requirements and adheres to the rigorous statutory and regulatory industry standards.

We are proud to be at the forefront of our service sector and constantly review and update our quality assurance management systems. We will continue to invest in our future and maintain our commitment to evaluating and improving our standards.
